

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Class I Income USD (ISIN: IE00BD2BLF30) Semper Total Return Fund (the "Fund") a sub-fund of GemCap Investment Funds (Ireland) plc (the 'Company')

The Fund is managed by Gemini Capital Management (Ireland) Limited, which act as manager to the Company

Objectives and Investment Policy

The investment objective of the Fund is to generate capital growth over the medium to longer term.

The Fund seeks to provide income and capital appreciation by investing directly into global fixed income securities and/or gain exposure to fixed income securities through the use of Financial Derivative Instruments ('FDI').

Income on your investment will be paid to you quarterly on, or about, 1 March, 1 June, 1 September and 1 December.

The Fund's investment in fixed income securities are expected to have a special focus on the mortgage sector. "Fixed income securities" include mortgage-backed securities ("MBS"), asset-backed securities, corporate debt securities, residential mortgage-backed securities ("RMBS"), commercial mortgage-backed securities ("CMBS"), U.S. and other government agency securities, loan participations (as outlined below), collateralized loan obligations ("CLOs"), collateralized mortgage obligations ("CMOs"), variable and floating rate bonds.

The Fund may invest without limit in fixed income securities that are unrated or securities whose rating has been withdrawn. The Fund may invest without limit in such fixed income securities that are rated below investment grade (i.e., "high yield" or "junk" ratings). The Investment Manager considers a security to be below investment grade if it is rated below BBB (or comparable) by a nationally recognized credit rating organization including Standard & Poor's Ratings Services ("S&P") and Moody's Investors Service, Inc. ("Moody's"), or if unrated, determined by the Investment Manager, using best efforts and acting prudently, to be of comparable

quality. MBS refers to a type of fixed income instrument that represents an interest in a pool of mortgages, including RMBS and CMBS, and includes securities issued by government sponsored entities (agency MBS) as well as securities issued by private entities (non-agency MBS). MBS both include fixed and variable rate securities with underlying fixed or variable rate mortgage loans, respectively.

The fixed income securities in which the Fund may invest will typically be listed or traded on a Recognised Exchange.

Whilst it is the intention that the Fund be fully invested as described above, the Fund may also invest in high-quality, short-term debt securities and Money Market Instruments where the Investment Manager considers it to be in the best interest of the Fund to do so for temporary defensive purposes.

The Fund may use FDI for hedging purposes. The FDI which the Fund may use may be exchange-traded or over-the-counter. These FDI may include futures (including treasury and equity futures, contracts for difference, forwards (including FX forwards), swaps and options on global fixed income securities that provide exposure to fixed income securities.

You can buy or sell your shares in the Fund on any day in which banks in Ireland and the UK are open for normal business.

Risk and Reward Profile

The indicator above illustrates the position of this Fund on a standard risk/reward category scale.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean investment is "risk free".

This indicator is not a measure of the risk that you may lose the amount you have invested.

The Fund is in category 2 because of the exposure to equity markets is minimal.

The indicator above does not take account of the following risks of investing in the Fund:

General Investment Risk: the securities in which the Fund invests are subject to normal market fluctuations and may fall as well as rise in value.

Derivative Risk: The use of derivatives may result in greater returns but may entail greater risk for your investment. Derivatives can also reduce gains you may otherwise have made and may result in greater fluctuations of the net asset value of the Fund.

Credit and Counterparty Risk: There is a risk that the issuer of debt securities or a counterparty to a derivatives contract may not be able to meet interest, principal or settlement payments or otherwise honour their obligations.

Market Risk: The fund may invest in securities and markets which experience specific risks due to increased volatility, liquidity, political and economic stability.

Custodial Risk: There may be a risk of a loss where the assets of the fund are held in custody that could result from insolvency, negligence of fraudulent action of the custodian or sub custodian.

For a more detailed explanation of risks, please refer to the "Risk Warnings" section of the Prospectus and Fund Supplement.
